

FORESTGIFT

REAL EARTH LEGACY

Forest for Institutions

“

We convert students into
sustainability-driven individuals

while transforming campuses
into living ecosystems.

ABOUT FOREST (INSTITUTION MODEL)

Forest is a structured sustainability system designed for educational institutions.

It integrates student participation, behavioral change, and environmental action into a single continuous program.

This is not a one-time activity.
It is a campus-wide transformation model.

THE CORE VISION

Every student becomes environmentally responsible

Every campus becomes a living, growing ecosystem

Sustainability becomes part of daily student life

01

STUDENT TREE DISCIPLINE (CORE SYSTEM)

What We Implement :

- Every student is assigned a tree annually
- Tree is tagged to student identity
- Plantation is executed in structured batches

What This Creates :

Personal ownership
of environmental
impact

Collective contribution
at scale

Discipline-based
participation
(not optional activity)

Outcomes :

- Strong emotional connection between student and nature
- Real, measurable environmental contribution
- Sense of responsibility and pride

02

CAMPUS TRANSFORMATION MODEL

Goal :

- Convert unused / barren land into green cover every year

Execution :

- Annual plantation cycles
- Structured land utilization planning
- Batch-wise student involvement

What Your Campus Becomes:

- A “Living Sustainability Campus”

Outcomes :

- Visible physical transformation of campus
- Long-term environmental asset
- Strong institutional identity

03

“SUSTAINABLE ME” SYSTEM (BEHAVIORAL CHANGE FRAMEWORK)

What We Provide :

- Student-focused sustainability guide
- Practical checklist of Daily eco habits, Waste reduction & Energy-saving practices

How It Works :

Monthly sessions / integration
into student activities

Simple, actionable
implementation
(no theory overload)

Outcomes :

- Students develop lifelong sustainable habits
- Reduced waste and resource usage on campus
- Culture shift from awareness to action

04

CULTURE & RECOGNITION SYSTEM

What We Do :

- Celebrate selected student milestones (birthdays / achievers)
- Link recognition with tree plantation
- Public acknowledgment inside campus

What This Creates :

Builds emotional connection with institution

Encourages participation through recognition

Creates organic social visibility

Outcomes :

- Stronger student engagement
- Positive campus environment
- Recognition-driven participation

05

FOREST DASHBOARD (INSTITUTION-LEVEL TRACKING)

What We Provide :

A structured dashboard showing:

- Total trees planted
- Sustainability indicators
- Student participation percentage

Usage :

Internal
monitoring

Institutional
reporting

Documentation
support

Outcomes :

- Clear visibility of impact
- Data-backed institutional narrative
- Organized sustainability tracking

06

PLANTATION EVENTS & ENGAGEMENT DRIVES

What We Implement :

- Annual / bi-annual plantation drives
- Student participation at scale
- Institutional branding presence

Usage :

High visibility events

Hands-on student involvement

Strong community engagement

Outcomes :

- Increased participation
- Enhanced credibility
- Strong campus energy

07

CERTIFICATION SYSTEM

For Students:

- Tree-linked certificate (eco participation record)

For Institution:

- “Forest Participating Campus” recognition

Positioned as:

Support for institutional sustainability efforts
(Not an official accreditation)

Outcomes :

- Tangible recognition for participation
- Strengthened institutional image

08

ENTREPRENEURSHIP PIPELINE (DIFFERENTIATOR)

What We Enable :

- Identify students with sustainability-driven ideas
- Provide guidance and selective support
- Encourage green innovation

Usage :

Builds future
entrepreneurs

Positions institution
as innovation-driven

Expands Forest
ecosystem

Outcomes :

- Student-led sustainability initiatives
- Innovation culture on campus
- Long-term ecosystem building

VALUE CREATED

For Institution

- Strong campus culture
- Higher student engagement
- Structured sustainability system
- Support for NAAC / ESG narrative
- Increased visibility and reputation

For Students

- Real-world sustainability experience
- Personal responsibility and identity
- Behavioral transformation
- Participation in meaningful impact

For Campus Ecosystem

- Physical green transformation
- Reduced waste and resource usage
- Long-term environmental contribution

PROGRAM STRUCTURE

Basic

- Plantation + certification
- Introductory sessions
- Initial dashboard setup

Growth

- Full student participation
- Sustainable Me implementation
- Events + dashboard tracking
- Culture integration

Impact

- Full campus transformation model
- Annual land conversion goal
- Entrepreneurship pipeline
- Recognition systems

IMPLEMENTATION MODEL

WHAT WE EXPECT FROM INSTITUTION

Appoint one coordinator

Provide time slots for sessions

Enable on-campus execution

Encourage student participation

Support land access or identification

SYSTEM DISCIPLINE (IMPORTANT)

One student = one tree

Real
participation (no symbolic
activity)

Continuous annual
engagement

Structured execution
(not one-day events)

WHAT MAKES FOREST DIFFERENT

Integrated
into student
life

Focus on
behavior,
not just
plantation

Measurable
+ visible
outcomes

Scalable
across
institutions

Builds
future
sustainability
leaders

POSITIONING STATEMENT

“

Forest is not an event or plantation drive.

It is a structured sustainability
system for institutions.
